Subject	Level	Study Mode	Duration	Start Date
Engineering	Level 2	Full-Time	2 years	Any Time

## The Course

Start your career as a Land-Based Service Engineer with this apprenticeship. You will work alongside experienced staff, gain job-specific skills, knowledge and behaviours within the land-based engineering industry. You will earn a wage and be released to study during your working week. You will work on a diverse range of tasks and machinery, this may be agriculture or ground care. You need to have a strong work ethic and positive attitude, be able to employ a logical approach to problem solving and aim to improve quality, adapt to different situations, and have the ability to work as part of a team as well as independently. You may have to work irregular hours.

## Course Aims

> To develop your knowledge, skills and behaviours as required for employment and future career progression within the industry.

## What You Will Study

- > Health and safety
- > Identification and application of tools and equipment
- > Operating principles of machinery and equipment
- > Preparation of new and second-hand machinery
- > Pre-inspection of machinery
- > Routine servicing and maintenance
- > Preparation of equipment for repair, repair and post repair
- > Routine machine operation and system testing
- > Thermal joining of metals and materials
- > Record keeping

## Entry Requirements

You will need appropriate employment in the land-based engineering industry. It is preferable that you have a minimum GCSE grade 3/D in English and Maths.

## Teaching and Learning Approach

You will develop your knowledge, skills and behaviours through theory and practical-based lessons

## Time Required on Campus

You will be released from work one day per week to undertake training at the college.

## Work Experience

Employed within the industry, you will work 30 - 40 hours per week.

## How You're Assessed

You will be assessed through an end point assessment (EPA) and graded pass, merit or distinction. Please note that the duration does not include the EPA.

## Clothing, Equipment and Additional Costs

- > Stationery such as pens and paper
- > An electronic device to access online learning, i.e. a laptop
- > Steel toe-capped boots and overalls for practical sessions

## Progression

You may progress to a higher-level apprenticeship or course at the college. You may also be offered a higher-level role e.g. assistant engineering technician, in your workplace.

## Careers

Typical careers include Agricultural Service Engineer or Technician, Outdoor Power Equipment Service Engineer, Plant and Equipment Service Engineer.
